New Hope, PA

MADE IN THE USA

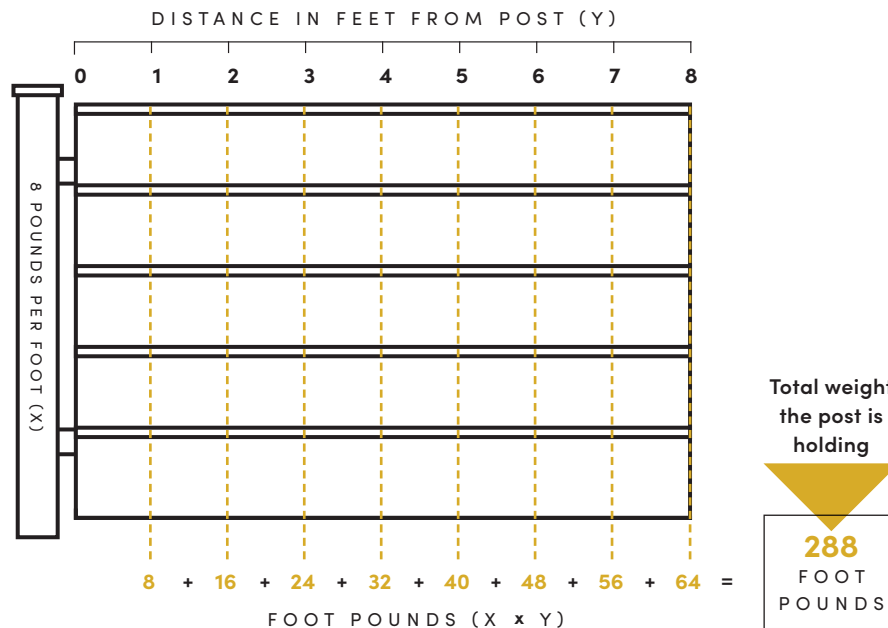

GateJak mounts easily on vinyl, wood, and metal gates including metal tube, chain link, wrought iron, and ornamental aluminum up to 2 inches wide.

Adapts to changes in ground level/grade up to 14 inches.

PATENT
PENDING

The Problem

Constant Pressure on your gate, gate post and hinges from foot pounds of pressure. Example, an 8 ft gate weighing 64 lbs. equals 8 foot lbs. of pressure per each foot. This excessive weight begins to degrade your investment *immediately*.

The Solution

GateJak installs at the end of the gate where it will be most effective reducing gate sag, post upheaval and need for hinge adjustments.

GET SOCIAL

Support your gate, **protect** your investment, keep your property looking its best, and reduce maintenance time and labor costs with the *GateJak, Ultimate Support System*.

Benefits of using GateJak

GateJak is easy to use and affordable.

Helps prevent and fixes sagging gates to beautify your entire property.

Weight will be taken off the gate, hinges, and gate posts.

GateJak is more convenient, cost effective and long lasting than setting posts in concrete.

Made in the USA.

By purchasing the GateJak, you are supporting American manufacturing and employing American families.

Protects your fence investment, saves time and reduces maintenance and repair costs.
